## **Submittal Data Sheet**

(H,Y)VWH(P,R)144B\_2S Water Source Condensing Unit 12 Ton, Heat Pump and Heat Recovery, 208-230V/60/3 and 460V/60/3

| Job Name:         | Location:    |  |
|-------------------|--------------|--|
| Purchaser:        | Order No:    |  |
| Engineer:         |              |  |
| Submitted By:     | Date:        |  |
| Unit Designation: | Schedule No: |  |
| Construction:     | Model No:    |  |

# **Features and Benefits**

- Compact, modular and light weight equipment installed entirely inside the building enhances design flexibility and makes it easier to adapt to different building types
- Wide capacity range with all Inverter Compressors delivering maximum efficiency at part load conditions, providing comfortable individual zone control
- Outstanding VRF solution for cold climate applications – operation and capacity not affected by outside temperature, no defrost operation required
- Flexible solution with 1-, 4-, 8-, and 12- port change-over boxes for heat recovery applications
- Energy efficient and personal comfort solution via simultaneous cooling and heating capability, for heat recovery
- Refrigerant cooled Inverters for reliable and efficient operation
- Developed for easy installation and service – field selectable top or front refrigerant connections and easy accessible control and easy accessible control

#### **Technical Data**

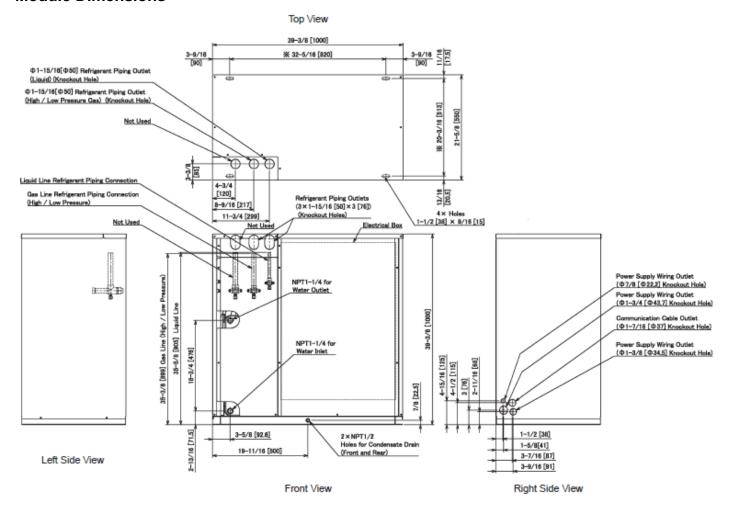

| (H,Y)VWHP144B_2S Heat Pump              |                          |             |  |
|---|--------------------------|-------------|--|
| (H,Y)VWHR144B_2S Heat Recovery          |                          |             |  |
| Unit Performance                        |                          |             |  |

|   | R)144B32S                | ,           |  |
| Power Supply (V/Hz/Ph)                  | 208-230/60/3 460/60/3    |             |  |
| Nominal Capacity, Cooling (Btu/h)       | 144,000                  |             |  |
| Nominal Capacity, Heating (Btu/h)       | 162,000                  |             |  |
| IEER, Non-Ducted (Btu/wh)               | 24.90                    |             |  |
| COP68, Non-Ducted, Heating (W/W)        | 5.42                     |             |  |
| Unit Details                            |                          |             |  |
| MCA (A)                                 | 37-34                    | 20          |  |
| MOP (A)                                 | 50-45                    | 25          |  |
| Dimensions H x W x D (")                | 39-3/8 x 39-3/8 x 21-5/8 |             |  |
| Net Weight (lbs)                        | 556                      | 564         |  |
| Refr. Piping, Gas/HL(for HR)/Liquid (") | 1-1/8 / (7/8) / 1/2      |             |  |
| Water Pipe Size, Inlet and Outlet (")   | 1-1/4                    |             |  |
| Sound Pressure (dBA)                    | 58                       | 58          |  |
| Refrigerant Type                        | R410A                    |             |  |
| Refrigerant Charge (lbs)                | 13.7                     |             |  |
| Water Inlet Temp Range (°F)             | 50-113                   |             |  |
| Water Flow, Rated / Range (GPM)         | 36.5 / 22-63             |             |  |
| Pressure Drop at Rated Flow (ft wg)     | 15                       |             |  |
| Max./Recommended No. of IUs             | 26 / 10                  |             |  |
| Connection Ratio Range (%)              | 50 - 130                 |             |  |
| System Details                          |                          |             |  |
| Max. Total Piping Length (ft)           | 984                      |             |  |
| Max. Vert. Distance, CU above IU (ft)   | 164                      |             |  |
| Max. Vert. Distance, CU below IU (ft)   | 131                      |             |  |
| Max. Vertical Distance, IU to IU (ft)   | 49                       |             |  |

Performance ratings are based on AHRI 1230 test standard

For additional product information, refer to the Engineering Manual

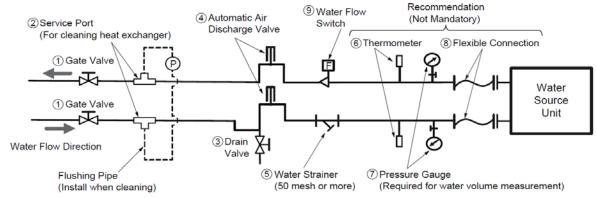

Version 201810

## **Module Dimensions**

<sup>3</sup>rd pipe is for heat recovery only.

# **Piping Connections**

Items ① through ⑨ are field supplied.
